

WHAT IS CLAIMED IS

1. A method of processing a browser request specifying a destination network resource, the method comprising:
intercepting a browser request that specifies a selected destination network resource;
and
redirecting the browser request to a network server that differs from the destination resource specified by the browser request.

2. The method of claim 1, wherein the intercepting includes:
routing the browser request to a proxy server including a list of selected network resources;
comparing the browser request to the list of selected network resources; and
intercepting the browser request when the browser request includes one or more of the selected network resources that are specified by the list.

3. The method of claim 1, wherein the redirecting includes:
comparing the browser request to a list that includes instructions associated with the destination resource; and
performing the instructions associated with the destination resource.

4. The method of claim 3, wherein performing the instructions includes displaying content that differs from the destination resource.

5. The method of claim 3, wherein the performing the instructions includes:
adding content to the destination resource; and
displaying the destination resource that includes the added content.

6. The method of claim 3, wherein the performing the instructions includes displaying contents from the destination resource from a network server that differs from the destination resource.

1 7. A method of processing a browser request specifying a destination network resource,
2 comprising:

3 intercepting a browser request received from a client computer at a proxy server when the
4 browser request specifies a selected destination network resource; and
5 performing instructions associated with and in addition to instructions performed to
6 download the selected destination network resource.

1 8. The method of claim 7, wherein the intercepting includes:
2 routing the browser request to the proxy server including a list of selected network
3 resources with associated instructions;
4 comparing the browser request to the list of selected network resources; and
5 intercepting the browser request when the browser request includes one or more of
6 the selected network resources that are specified by the list.

1 9. The method of claim 7, wherein the performing instructions includes displaying
2 content that differs from the destination resource.

1 10. The method of claim 7, wherein the performing instructions includes:
2 adding content to the destination resource; and
3 displaying the destination resource that includes the added content.

1 11. The method of claim 7, wherein the performing instructions includes displaying
2 contents from the destination resource from a network server that differs from the destination
3 resource.
